

ALUMINUM WALL COPINGS

ALU-CLICK® system — No silicone · No visible fasteners · Made to measure

The ALU-CLICK® system protects walls and parapets with a mechanical fastening mechanism that completely eliminates the need for silicone. Watertight bituminous seals and an aluminum profile coated with 25 microns of polyester lacquer on both sides deliver exceptional durability with no need for periodic maintenance.

- No silicone or sealants
- Made to measure
- High corrosion resistance
- No visible fasteners
- Watertight bituminous seals
- Quote within 24 working hours
- Lacquered aluminum 12/10 mm
- Width 70–600 mm
- ISO 9001:2015
